CURRENT TOPICS

A new post-office in Alabama is named after the late Senator.

Horseback riding has become a craze in Washington.

Jeff Davis' book on the war will be issued in autumn.

French gray, blue and slate trousers are now popular.

Managers of the new run sixteen thousand feet of wire.

One thousand miners are on a strike at Birmingham, Ala.

Lord Lansdale is still pushing on towards the North Pole.

One wool-grower in San Diego shipped 3,000 pounds in one week.

In England the draft horse is never driven faster than a walk.

London's Randolph Churchill will soon visit America with his wife.

Mexico desires to effect a reciprocity treaty with the United States.

One of the horses used on a stage line near Albany has a heavy mustache.

The Massachusetts liquor law allows fifty cents a gallon for 1,000 population.

Secretary Hayard is officially advised of the disappearance of cholera in Valparaiso.

General Sherman is building a beautiful and expensive summer home at Nantucket.

The German Crown Prince has ordered the military bands to play "Enter the Kaiser."

William Sherwood, of Baltimore, Md., will spend one year in prison for stealing a Bible.

Boston is criticised because of a Boston sign which reads: "Lawn Mowers Mended in the Rear."

An experimenter has made a lens of ice with which he was able to light pipes by means of the sun's rays.

A letter was mailed in Greenville, Ga., the other day directed to Zerkness, Ga. It was sent to Xerxes, Ga.

An alligator was killed in the Ashley river, N. C., which weighed 25 pounds and was nine feet eight inches long.

Attempts have been made at St. Louis and Chicago to introduce the use of goats' flesh for food, but without success.

There will be 322 delegates in the Republican National Convention, consequently 415 votes will be necessary to nominate.

The marriage of Prince Henry and Princess Irene of Hesse, which was fixed for this month, has been postponed until July.

The Union Labor Convention at Sedalia, Mo., nominated a State ticket, headed by A. R. Mandring, of Maryville, for Governor.

There are thirty-eight lawyers in Philadelphia who sole business is to induce people to bring libel suits against newspapers.

The latest Arkansas sensation is a negro baby with two heads and faces, one arm and three legs, upon which it stands tripod fashion.

A Tennessee boy has been discovered who enjoys no food so well as adios and uses these, which he consumes in large quantities.

Oliver Byrne, who lately died in Louisiana, was considered the richest planter there. His wealth was placed at some \$45,000,000.

During this year Queen Victoria, John Ruskin, General Rosecrans, Cyrus W. Field and Julia Ward Howe will each be sixty-nine.

Connellus Vandenberg's income from his capital is said to be a million dollars a month, while that of Wm. K. is not very far behind it.

An enterprising advertiser suggests that "ladies should do their own dying." He would apparently do away with the services of stern physicians.

Minnie Terry, a six-year-old niece of Helen Terry, receives fifty dollars a week for her artistic work in "Bottle's Baby," at the Royal Theatre, London.

A Swedish man is victimizing North Omaha housewives by selling them Indian turnip roots as "French turnip bulbs." He got fifty cents apiece for them.

Zola, the novelist, is just forty-eight, and was once so poor that he lived a whole winter on bread and oil. His first writings the publishers would not look at.

The smallest piano ever made—twenty-six inches high and fifteen deep—has just been turned out by a Baltimore maker for use on a steam yacht of that city.

The N. Y. Herald has reports from all parts of the country which indicate a reduction of from 50,000,000 to 80,000,000 bushels of wheat production, as compared with last year.

M. N. Blusser, of Newcomer, Tex., is the proud possessor of a cow with eighteen horns, and this same cow is at present producing a yearling calf equally cornucopian.

Major Chas. S. Hill, of Washington, has been appointed Commissioner of United States Exhibits at the National Exposition to be held in August, from October 10 to November 17.

Australia has no use for Chinese laborers. The authorities at Melbourne recently quarantined a vessel containing nearly 800 Chinese, disregarding their naturalization papers, and refused them permission to land.

Goat Island, at Niagara Falls, is being washed away by the rapid current, and the State engineer recommends an appropriation of a retaining wall of timber to prevent further ravages.

Norman R. Ream, a well known Chicago speculator, who has accumulated a fortune of \$3,000,000 to \$5,000,000 in grain and provisions, was selling mackerel and brown sugar in a country store at Princeton, Ill., a few years ago.

Two haggard Italian children, who were arrested in Chicago while gathering cigar stumps on the streets, explained that they sold the discarded weeds to a fellow-countryman for fifteen cents a pound, and that they were "made into cigarettes."

Judge Finkler, at the request of counsel for John W. Keady, has granted an extension of sixty days in the time for the inspection of the Keeley motor recently ordered by the court.

An Ottawa dispatch says that a fleet of cruisers will guard the Canadian coast against American fishermen this season, but the regulations will be enforced less harshly than heretofore.

General Boulenger has sold the manuscript of his book, "The German Invasion," for \$40,000. Six months ago, before he became notorious, he could not have secured the tenth of that sum for it.

A STRANGE DEATH.

The Sad Fate of Little Walter Rührwein.

While Drinking at a Hydrant His Lungs Became Filled With Water.

CINCINNATI, May 9.—Walter Rührwein, two and a half years old, was playing with some companions in a large open court in the rear of his father's residence on Wade street.

The child and his companions had been running about the yard for several hours, and becoming overheated and thirsty he went to the hydrant for a drink.

The hydrant rests up against the building, the faucet being about three feet from the ground. Walter was just about to reach the faucet and place his mouth under it, when he turned and saw a woman standing near the hydrant.

The woman was a stranger, and the child was frightened. He turned and ran towards the hydrant, and as he did so he fell over the hydrant and his head struck the faucet.

The child was killed instantly. The water rushed into his lungs and he died. The mother was horrified and rushed to the scene.

The child was lying on the ground, his head under the faucet. The water was still running. The mother was crying and shouting for help.

The police were called and they found the child. They took him to the hospital, but he was already dead. The mother was taken to the hospital and she was very sad.

The police are investigating the case. They want to know how the child got there. They want to know who the woman was.

The mother is very sad. She is crying and shouting for help. She wants to know what happened to her child. She wants to know who the woman was.

The police are investigating the case. They want to know how the child got there. They want to know who the woman was.

A CATHEDRAL IN RUINS.

Natural Gas the Cause of Its Destruction—Loss, \$250,000.

BUFFALO, N. Y., May 10.—This morning was a decidedly sensational and disastrous one in Buffalo. A number of explosions of natural gas occurred almost simultaneously, caused, as supposed, by an overpressure, and caused widespread excitement besides destroying the finest church in Buffalo and doing other damage.

St. Paul's Cathedral, the pride and glory of Buffalo, is in ruins. At 9:20 o'clock flames were seen bursting out of the fine, stained-glass windows of the church, at the junction of Main and Erie streets, and instantly most of the interior was a mass of flames. An explosion had occurred in the basement, the furnace being supplied with natural gas, and the force was so great as to tear off and blow out the heavy doors on Erie and Pearl street side. People ran to see what was the matter, and a few entered the vestibule of the church, only to be driven out by the flames. An alarm was at once turned in, to which the fire department quickly responded, but when they arrived the interior of the church was a mass of flames. The fire was undoubtedly caused by an explosion of natural gas, as no smoke or signs of fire were seen until after the great doors had been blown in.

At 9:20 o'clock flames were seen bursting out of the fine, stained-glass windows of the church, at the junction of Main and Erie streets, and instantly most of the interior was a mass of flames. An explosion had occurred in the basement, the furnace being supplied with natural gas, and the force was so great as to tear off and blow out the heavy doors on Erie and Pearl street side. People ran to see what was the matter, and a few entered the vestibule of the church, only to be driven out by the flames. An alarm was at once turned in, to which the fire department quickly responded, but when they arrived the interior of the church was a mass of flames. The fire was undoubtedly caused by an explosion of natural gas, as no smoke or signs of fire were seen until after the great doors had been blown in.

St. Paul's Cathedral, the pride and glory of Buffalo, is in ruins. At 9:20 o'clock flames were seen bursting out of the fine, stained-glass windows of the church, at the junction of Main and Erie streets, and instantly most of the interior was a mass of flames. Announcement.
We are authorized to announce **A. L. Shannon** as a candidate for Sheriff of Lawrence county, subject to the action of the Democratic Convention.

The Mississippi river is at a very high stage and several towns are under water.

The Democratic State Convention to select delegates to the St. Louis Convention met in Lexington yesterday.

The examination of Emperor Frederick's throat made last Saturday strengthened the belief that he will live only a short time.

The U. S. Supreme Court on last Monday rendered a decision in the Hatfield-McCoy habeas corpus case, and sustained the decisions of the lower courts.

The Senate Committee on Privileges and Elections considered the case of Senator Turpie last week, and unanimously decided that he is entitled to his seat.

Under the revisions of the school law both the duties and the compensation of the County Superintendents are increased, and the examinations which the candidates for this office are compelled to undergo are more rigid.

The Tennessee Democratic State Convention met in Nashville on Wednesday of last week. A fight between the "Bob Taylor and anti-Bob Taylor men" began and lasted several days. No nomination had been made at last reports.

It is thought that a vote on the Mills Tariff Bill will not be reached until about the last of June. The two parties will "stack arms" while the St. Louis and Chicago Conventions are in session, and this will delay final action on the bill.

The Mayor of Cincinnati has ordered the police to arrest at sight every violator of the Sunday law. The order is based upon the trial and conviction of the first offenders against the new law requiring saloons to be closed on Sundays.

John J. Cornelson, of Mt. Sterling, is now in the Jefferson county jail. Having exhausted the courts of Montgomery county in futile efforts to secure his release on writs of habeas corpus, he will probably next run the gauntlet of justice in Louisville.

Col. A. M. Swope and Col. Wm. Goodloe, prominent Kentucky Republicans, met in Lexington on Tuesday of last week for the first time since the Republican State Convention, and an altercation took place. The interference of friends prevented serious difficulty.

The Cincinnati Post, a newspaper that supported Blaine four years ago, says: "If Grover Cleveland shall live it now seems certain that he will be nominated and that he will poll more votes than in the election four years ago. The great bugbear that a Democratic Administration would ruin the country has been laid and the country contemplates another four years of Cleveland's Administration with perfect equanimity."

Courier-Journal, (May 11th.); The Democratic State conventions now being held indicate clearly the trend of public thought relative to Tariff Reform. Yesterday's results may be summarized as follows: Maryland indorses the Administration and declares in favor of tariff revision; Alabama is "unalterably opposed to the present war tariff. We demand a reform of the tariff and a reduction of the surplus in the Treasury by a reduction of tariff taxation," and Tennessee heartily indorses the administration of President Cleveland and his recent message to Congress; Vermont's permanent chairman of the convention was loudly applauded when he said: "We have but one candidate, but he is worth more than all others put together. Republicans want to elect the bloody shirt personified; but we want a set of principles personified in Grover Cleveland."

Kentucky Notes.
Hon. W. T. Ellis is the only Democrat in the Second district aspiring to the nomination to succeed Hon. Polk Laffoon in Congress.
The friends of Hon. G. Terry, State Senator from Todd county, are endeavoring to have him offer as a Democratic candidate for Congress in the Third district.
Hon. John D. Harris says he appreciates the honor of the votes of several counties for delegate from the State at large to St. Louis, but is not a candidate for the position.
The three Commissioners to adjust the "IO U's" found in Dick Tate's safe are Attorney-General Hardin, Judge W. P. B. Bush, and John Barrett. The last named gentleman is a Republican resident of Louisville.
Robberies and thefts in Lexington have been exceedingly numerous of late. A box containing \$7,800 was stolen from the safe of the Phoenix Hotel at Lexington, where it had been placed for safekeeping. Also, on the same day, \$500 was stolen from the room of L. T. Easton, Treasurer of the Eastern Insane Asylum.
John Richardson was arrested by Officers Donelan and Pennington, in Lexington, Saturday, but afterwards escaped. Being overtaken by the officers he shot at each of them, Donelan's wounds causing death soon afterwards. Richardson, with a pistol in each hand, ordered his horse at the stable where the shooting occurred and fled, hotly pursued by the Sheriff, two deputies and three policemen, who finally succeeded in capturing him.

Senator Voorhees apologized to the Senate for the recent use of unparliamentary language in debate, but the apology did not extend to Mr. Ingalls. He made the apology while the Kansas Man-Who-Looks-after-the-Robbers-of-the-Hen-Roost was not in the presiding officer's chair.—Courier-Journal.

Scientists say that the world's coal will be exhausted in 2,000 years. As many of us will by that time be settled in a climate that is perpetually very warm, we need not worry ourselves about the cold facts of science.—Courier-Journal.

The Norfolk & Western.
[Frontier Register.]
Editor REGISTER.—Some time ago the East Tennessee, Virginia and Georgia Railroad was a part of Norfolk & Western system. They lost it suddenly and unexpectedly, in what is known, I think, as the "Richmond Terminal Deal." This cut them off from any western outlet, and steps were immediately taken to remedy the matter. The Clinch Valley extension of the N. & W. was the outgrowth of these steps. It was to be met by the Louisville and Nashville people half-way. The N. & W. people went on and put their part under construction and expended millions of dollars. A single mile section in one part of it cost \$600,000. A great force of men worked day and night for months. The road is nearing completion, when lo! the L. & N. have run into a hill and stopped, miles and miles from the N. & W. and says to the latter, "We are willing to come further when the tunnel is done, but in the meantime we have concluded that you ought to build fifty miles more than was originally agreed upon."

Now that is where the hitch is; and it is an ill wind that blows nobody good, for the Norfolk & Western, having been temporarily defeated in getting a western outlet by the Louisville and Nashville, turns to its first love and begins anew its journey to the Ohio river via West Virginia. The engineers leave the valley of the Clinch with its tall grass and pure water for the greenbluffs and "moon-aline" of the raging Tug; the sound of the tunnel blasting and crack of the teamster's whip on Little Tom creek in the parent state, gives way to the "rod-up" of the engineer and "stick-stuck" of the land surveyor on the slopes of Pigeon or bluffs of Twelvepole in the "child of the storm." The festive bedbug, the garulous rattlesnake, the sneaking copperhead, the windy viper and the illicit distiller must all get in their work now while they may, for their days are numbered. The iron horse will soon snort where to-day the jackass brays; the box car will get away with the bobbed and the passenger coach supplant the wagon. Civilization will travel right along after the track-layers; and lightning rod men, book agents and feather renovators will take the place of singing masters and sewing machine agents. West Va. is going to grow; Eastern Kentucky is going to grow; Ironton is going to grow. Let those who don't want to keep up with the procession not get in front of it lest they be run over. Let them heed the warning, "Look out for the locomotive!" Let them remember that an old fogey dead is worth more to his community than an old fogey on foot.

THEIR BUSINESS BOOMING.
Probably no one thing has caused such a general revival of trade at R. F. Vinson's Drug Store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this city, valuable articles from the fact that it always cures, and never disappoints. Coughs, colds, asthma, bronchitis, croup, and all throat and lung diseases quickly cured. You can test it by getting a trial bottle free, large size \$1. Every bottle warranted.

THE COMMON SCHOOL LAW.
A Review of some of the Changes made by the Last Legislature.

The Bill amending the Common School Laws of Kentucky which was passed by the last General Assembly, is in many respects calculated to greatly better the common school system of our State, and will do much toward helping Kentucky to take rank along with her sister States in point of intelligence.

The Harrodsburg Democrat condemning the bill solely on the grounds that it contemplates a uniform series of questions throughout the State, prepared and sent out by the State Board under seal to County Superintendents; and goes on to state that a satisfactory examination cannot be made from one set of questions, even if Solomon himself were the framer of them. I take the liberty to say to the Democrat that the common school system in Kentucky proposes to give to its citizens the advantages only to be derived from a common school education, and does not in any degree propose to graduate its future citizens in all of the Isms and Ologies; and I can see no good reason why a set of questions contemplating a test of my knowledge of the common school branches in Lawrence County should not be an equal test in Mercer county or any other county of the State. And the State Superintendent, knowing the character of the examinations held in the respective counties of the State, can form some adequate conception of the ability of the teachers throughout the Commonwealth, when the grade of certificates that issue are forwarded to him in the general report of County Superintendents, and thus knowing, can come to some reasonable conclusion as to what is being accomplished here in the State of Kentucky, through the medium of her public schools, which have been wisely styled the people's colleges.

The bill enlarges the duties of the County Superintendents, compels the attendance of teachers upon county Institutes, and provides for the monthly payment of teachers; allows trustees to appoint their own collectors of tax, empowering said collectors to take by distraint, same as Sheriffs are now empowered to collect State revenue; provides for five months schools in all districts in the State after June 30th, 1889, and fixes five days upon which all examinations shall be held, viz: first Fridays in July, August, September, November and January, and no examination shall be held at any other time whatever; does away with State certificates and recognizes no diploma; compels district trustees to build good and comfortable school houses within six months after having been notified in writing so to do by the County Superintendent; and many more changes, all of which are good, and, as I think, conducive to the general welfare of the common school system throughout the state; and we shall hail with delight the time when teachers will be paid according to the grade of their certificates, and not make it a mere matter of chance as to whether a first or third class teacher shall receive the better wages.

R. C. McCLEURE.

Food Tests in New York.
Official Analysis of Baking Powders—Adulterations in Cream of Tartar.

Under the direction of the New York State Board of Health, eighty-four different kinds of baking powders, embracing all the brands that could be found for sale in the State, were submitted to examination and analysis by Prof. C. F. Chandler, a member of the State Board and President of the New York City Board of Health, assisted by Prof. Edward G. Love, the well-known United States Government chemist.

The official report shows that a large number of the powders examined were found to contain alum or lime; many of them to such an extent as to render them seriously objectionable for use in the preparation of human food.

Alum was found in twenty-nine samples. This drug is employed in baking powders to cheapen their cost. The presence of lime is attributed to the impure cream of tartar of commerce used in their manufacture. Such cream of tartar was also analyzed and found to contain lime and other impurities; in some samples to the extent of 93 per cent of their entire weight.

All the baking powders of the market, with the single exception of the "Royal" (not including the alum and phosphate powders, which have not the virtue of even an impure cream of tartar), are made from the adulterated cream of tartar of commerce, and consequently contain lime to a corresponding extent.

The only baking powder yet found by chemical analysis to be entirely free from lime and absolutely pure is the "Royal." This perfect purity results from the exclusive use of cream of tartar specially refined and prepared by patent processes which totally remove the tartrate of lime

and other impurities. The cost of this chemically pure cream of tartar is much greater than any other, and for this reason this greater cost is used in no baking powder but the "Royal."

Prof. Love, who made the analysis of baking powders for the New York State Board of Health, as well as for the Government, says of the purity and wholesomeness of the "Royal":
"I find the Royal Baking Powder composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphate or other injurious substance. E. G. Love, Esq., D. D."

It is highly satisfactory to the housekeepers of this vicinity, where the Royal Baking Powder is in general use, the investigations by the analysts in Massachusetts, New York, and Ohio, the only States that have thus far taken action upon this important subject, agreed in classifying it as the purest and most efficient baking powder in the market.

"We love Grover Cleveland for the enemies he has made," said Gen. Bragg; "We love him for the message he has written," says the St. Paul Globe; "We love him for the rascals he has turned out," says Tammany; "We love him because he led us to victory in 1884 and can do it again," says the Democratic party, the only sure enough s. o. p. on earth.—Louisville Times.

BRACE UP.
You are feeling depressed, your appetite is poor, you are bothered with headache, you are nervous, and generally out of sorts, you want to brace up, brace up, but not with stimulants, spring medicines, or bitters, which have for their basis a very cheap, bad whiskey, and which stimulates you for an hour and then leaves you in a worse condition than before. What you want is an alternative that will purify your blood, start life into action of liver and kidneys, restore your vitality, and give renewed health and strength. Such a medicine you will find in Electric Bitters, and only 50 cents a bottle at R. F. Vinson's drug store.

Great Campaign Offer.

The Weekly Courier-Journal has now the largest circulation of any Democratic newspaper in the United States and its publishers to further extend its circulation offer to send it, postage prepaid, from June 4th, 1888, to December 31st, 1888—31 issues—for only fifty cents.

Subscriptions sent before June 4 will be entered from that time, but those received after June 4 will be entered from the date received, to expire Dec 31st, 1888.

The rate to clubs of eight and over are extremely liberal. A sample copy of the Weekly Courier-Journal containing its great campaign offer can be procured, free of charge, by addressing W. N. Haldeman, President Courier-Journal Company, Louisville, Ky.

The subscription price of the Daily Courier-Journal, without the Sunday issue, is \$10 a year. Price of Sunday Courier-Journal is \$2 a year.

ROYAL BAKING POWDER
Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight alum or phosphate powders. Sold only in cans. **ROYAL BAKING POWDER CO., 106 Wall St., N. Y.**

SOLID.
Accident Insurance at Actual Cost. No Claims Due and Unpaid. All just claims paid promptly and in full.
\$5,000
In case of Death by Accident.
\$2,500
For Loss of Arm or Leg.
\$25
Per Week Indemnity, At a cost of about
\$13
Per Year payable either cash down or in Installments. Membership Fee, \$5.
